Bireuen, Aceh, Indonesia

EXECUTIVE SUMMARY

Fresh Graduate in Computer Science from Universitas Syiah Kuala with hands-on experience in Data Analysis, Data Science, Machine Learning, Deep Learning, and Artificial Intelligence. Experienced in designing end-to-end data-driven solutions, including data preprocessing, exploratory data analysis (EDA), data visualization, feature engineering, predictive modeling, recommendation systems, natural language processing, and computer vision. Proven ability to transform complex datasets into actionable insights through internship experience, national and international competitions, and real-world projects. Passionate about leveraging data and AI technologies to solve business and operational challenges while continuously learning and applying emerging technologies

EDUCATION

Universitas Syiah Kuala

Bachelor of Computer Science | GPA: 3.70/4.00, Cum Laude

Final Thesis: Development of a Lightweight Multi-Task CNN with Self-Attention for Plant and Leaf Disease Identification.

Banda Aceh

Aug – Sept 2025

RELATED EXPERIENCE

PT PLN (Persero)

Data Scientist – Intern

Banda Aceh

Aug – Sept 2025

- Developed forecasting models using historical IP-VPN operational data to predict service disruption resolution times.
- Built end-to-end machine learning pipelines covering data preparation, model training, and retraining workflows.
- Developed monitoring dashboards to support model performance tracking and operational forecasting.

TRAINING

Coding Camp Powered by DBS Foundation 2025, Dicoding Indonesia

Machine Learning Cohort

Online

Feb – Jul 2025

- Completed an intensive project-based Machine Learning program powered by DBS Foundation and Dicoding Indonesia.
- Developed end-to-end projects in Data Analysis, Machine Learning, NLP, and Recommendation Systems using Python and TensorFlow.
- Strengthened analytical thinking, problem-solving, collaboration, and presentation skills through project-based learning and mentoring sessions.

AWARDS AND ACHIEVEMENTS

1st Place, LOGIKA UI National Data Science Competition - Universitas Indonesia

Nov 2025

- Developed a hybrid YOLO–CNN model for hierarchical image classification, outperforming 260+ teams.

2nd Place, FIT International Data Science Competition - Satya Wacana Christian University

Aug 2025

- Developed a lightweight deep learning model for weather classification in a 12-hour international coding competition.

Finalist, AI x Creativity National Hackathon Competition - Alibaba Cloud

Mar 2026

- Developed a GenAI-powered content generation platform using Qwen and Wan models, competing against 140+ teams.

International Student Mobility Program 2025 – Malaysia

Oct - Nov 2025

- Represented Universitas Syiah Kuala in an international academic mobility program at Universiti Malaya (UM), Universiti Teknologi Malaysia (UTM), and Universiti Kebangsaan Malaysia (UKM).

PORTOFOLIO & SKILLS

Dashboard Portfolio : <https://www.sadinal.my.id/>

GitHub : <https://github.com/sadinal04>

Technical Skills

- Programming: Python, SQL, Java.
- Data Analytics: Microsoft Excel, Pandas, NumPy, Data Preprocessing, EDA, Data Visualization, Feature Engineering.
- Machine Learning & AI: Scikit-learn, TensorFlow, Keras, Machine Learning, Deep Learning, Computer Vision, NLP, Predictive Analytics.
- Deployment & Tools: Streamlit, FastAPI, Docker, Git.
- Databases: PostgreSQL, MongoDB.

Soft Skills: Analytical Thinking, Attention to Detail, Communication, Problem Solving, Team Collaboration, Time Management, Adaptability.

Language: Indonesian (Native), English (Intermediate).
